«The country of thousands of lakes and islands» with amazing northern nature, millions of azure lakes and romantic «carpet» of forests, for a long time has been a source of inspiration for artists and poets. This northern country changes its appearance followed by seasons of the year, though by magic: color, light, sounds, smells - in Finland, you can really feel in harmony with the environment.

It is impossible to think about Nordic culture without fairy trolls. Their modern, contemporary look in computer games and new fantasy literature is different from the well-known Mummiy Troll by Tove Jansson, inhabiting the island Kailo. Tina Khmelnytskaya is created a fantastic image of a modern troll with bright neon hair in the necklace "Dancing Troll", who begins to dance with joy every time he hears the sounds of music.
